Evaluation

Jim Dolan

Eli Manning

Technology in the Classroom

- Discover how to use technology in the classroom
- Capture the features that can enhance learning and your teaching
- Embed these strategies into your lessons to help students be more engaged and take more responsibility for their achievement

Technology Integration

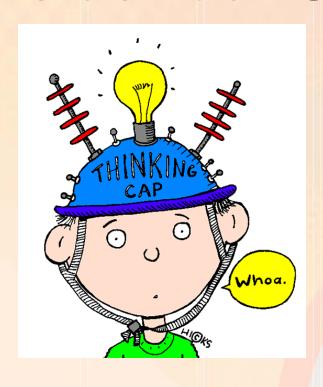

Things you can use now
Things you can use later
Things to consider for the future
Teacher Productivity
Student Productivity
Many of the practices can be used across disciplines

Simple

wife the same of t

Think before we jump into Technology

Consider Why? Goals/Objectives
Consider our Students

Our students have changed radically

Students are no longer the people our educational system was designed to teach

They have spent their entire lives surrounded by and using

- Computers
- Videogames
- Digital music players
- Web cams
- Cell phones
- And all the other toys of the digital age

The Average Teen.....

- Spends 40 hours a week using digital devices
- Spends 31 hours online
- Sends/Receives 3339 texts
- Girls Send/Receive over 4000!

But over 10,000 hours playing video games (not to mention 20,000 hours watching TV).

Computer games, email, the Internet, cell phones and instant messaging are integral parts of

their lives.

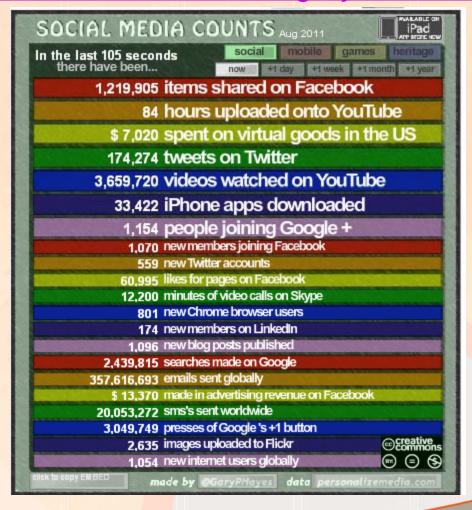

How about you?

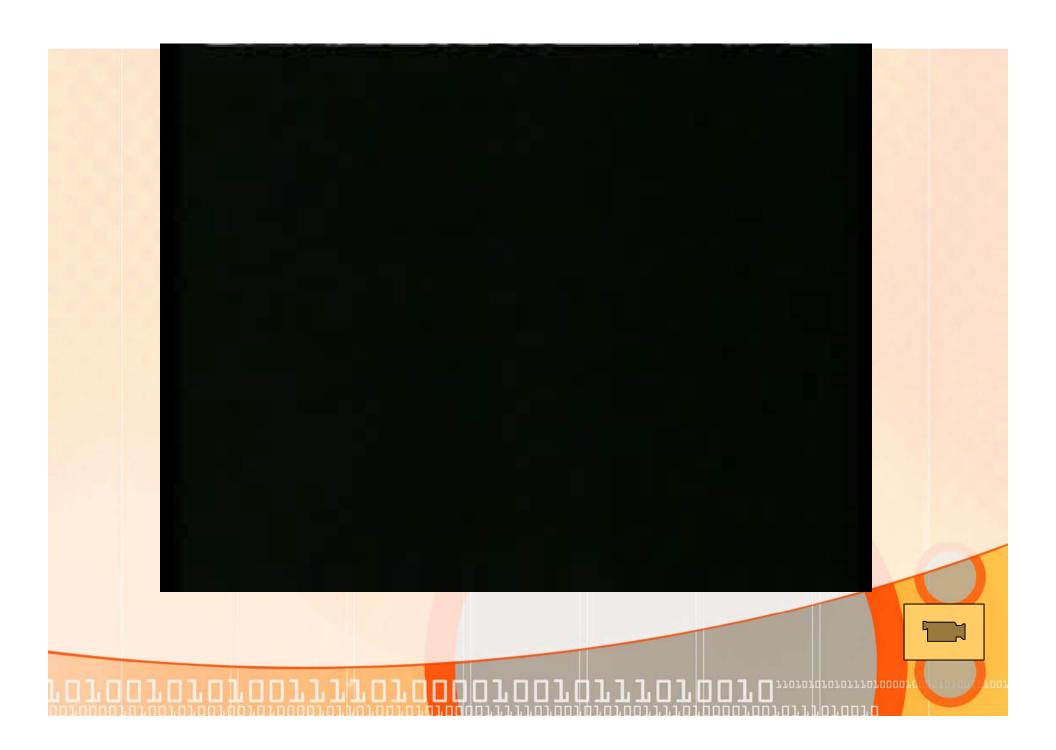

Social Media Counts

http://www.personalizemedia.com/garys-social-media-count/

As a result, students think and process information much differently

Teachers Have Important Jobs

ELEPHANTS

Larger than the moon

LAZY

Just cause you have to, dosn't mean you need too.

Wordle (Word Clouds)

- A tool for generating "word clouds" from text that you provide
- The clouds give greater prominence to words that appear more frequently in the source text
- You can tweak your clouds with different fonts, layouts, and color schemes
- The images you create with Wordle are yours to use
- You can print them out, or save them to the Wordle gallery to share with your friends
