Office of the
Superintendent

Dear Students and Parents,

Welcome to our Annual 5-8 Math and Science Awards Night.

Thank you to Dr. Herte for designing this night to celebrate excellence in mathematics and science. As you can see by the names on this program, we have some extremely talented students. Dr. Herte is committed to designing a challenging and rigorous curriculum and is responsible for the contests, competitions and academic team opportunities seen here tonight. Our students have participated in numerous contests and challenges and have received high honors in all.

Thank you to Mr. Delgado and Mr. Richards for their support of these programs. Also, a special thanks to teacher, Stella Hickok. Ms. Hickok is retiring this year after teaching in Montgomery since 1988. As a math teacher at LMS she has coordinated the Math Olympics for our 6th grade students for many years. She has also coordinated the Math League Contests for hundreds of students over the years. Stella has successfully made math fun, yet challenging, for the students of Montgomery. We wish her well!

Congratulations to all of the students here tonight for your outstanding performance and thank you to all of our parents for your continued support of our school district.

Warmly,

Nancy H. Gartenberg
Superintendent of Schools

Dear students, parents, faculty, and administration,

It is with great pleasure that I welcome you this evening to the Annual Mathematics & Science Awards Night for grades 5-8. The concept of this evening began several years ago when our Science Olympiad team won their Regional Competition. The bus ride home with the coaches and students was electric! The students were elated and I thought how wonderful it would be to bring this experience back to Montgomery for their parents and teachers. I am very grateful for the support from the Board of Education, administration, our talented faculty, and our very interested and involved parents. Thank you.

We are all very proud of how all the children did and most importantly for the number of students who voluntarily participate in the various contests. Each contest is designed for fun competition while providing students new challenges beyond the curriculum. We trust they have found these contests and competitions rewarding.

This evening, we want to provide each student the opportunity to hear their name called for the honors they have achieved. You can look ahead at each contest and see which contest or competition your child will be honored. I wish you a very rewarding evening as we honor our wonderful students. Let's also remember to thank those who have inspired our young mathematicians and scientists. Students have written a few words about someone who has been influential or inspirational in their mathematics and science. As you see during the PowerPoint, family members, teachers, friends, and in some cases the students themselves have been noted as making a difference to a student. -Inspiring and touching their future. One such person is 6th grade math teacher, Mrs. Hickok. Tonight we will also be honoring her for her contributions to the Math Olympiad and Math League contests as well as the students in her class.

Enjoy the evening and congratulations to all our award recipients!

Dr. Christopher M. Herte

Our mission as a forward-thinking community is to ensure that students grow into confident, compassionate, and successful learners in a global society by providing engaging and challenging educational experiences in a student-centered environment.
