

# MONTGOMERY360

September 2017

Dear Parents and Guardians,

Welcome to Montgomery360! With the last MHS Counseling/Guidance newsletter we included an introduction letter to Evolution Labs/Suite 360, a program that is designed to help students develop and maintain their social and emotional learning skills. The program curriculum consists of short lessons delivered to students each month on internet-connected devices. Each lesson will help students through a variety of methods, including videos, games, quizzes, and articles. We have tailored the program for our students at MHS and it will now be referred to as Montgomery360.

The first topic that will be assigned to all students will be "My Emotions," which will contain specific grade-appropriate content. When students complete the lesson, they will earn credit for a five-point homework assignment in Health and PE.

Please have your child check their mtsdstudent email for information about the program and the first lesson assigned to them. Students can complete the assignment on their own device during study hall or on their own time. Each lesson should take approximately 20 minutes to complete with the first lesson due on October 6, 2017. It is recommended that students download the Suite360 app from Android or iTunes and using the code "montgomery." Directions for downloading the app will be included in the email sent to your child's mtsdstudent address.

We would like you to be our partners in this program as well as in all we do to support your children in their growth socially, emotionally, and academically. Please ask your child to show you what is in the program.

Sincerely,

*Corie Gaylord*

Director of Student Academic & Counseling Services
