The UMS Paws for a Cause program focuses on developing social and emotional skills, exploring a different topic each month so that students and staff increase their ability to understand, welcome, and include all kinds of people in many different situations.

The focus for April is on **Resilience** and the skills needed to bounce back from difficult times.

We want the students to recognize that Resilience can develop through their exposure to different challenges, and by personally maintaining a healthy lifestyle with a positive mindset. The students will begin to explore tools that help them to build a strong personal foundation that is comprised of a healthy lifestyle and positive mindset.

Naviance is a resource that can provide our students with unique experiences that help to enhance their understanding about their strengths and abilities both in and out of the classroom. It is introduced at UMS to all 7th graders in the College and Career Readiness cycle course. The 7th graders set up their Naviance accounts in the cycle course and begin their journey of self-discovery utilizing Naviance as a tool. This will enable students to learn about their personal strengths and blind-spots, so that they can more confidently and positively approach their future goals and appropriately advocate for their personal needs.

The 8th grade students will continue their use of Naviance taking that next step in self-discovery.

Parents are encouraged to visit their child's Naviance accounts once they begin work in their cycle classes.

Naviance is a tool that will be used throughout students' high school experience to explore careers that match their strengths and interests and, when the conversations about colleges begin, to search for colleges that are the best fit based on the students' interests, goals, and abilities.

The human capacity for burden is like bamboo—far more flexible than you'd ever believe at first glance.
