

E600 & E200 Heart Rate Monitors

INSTANT FEEDBACK KEEPS KIDS INVOLVED.

Developed specifically for PE with extensive feedback from physical educators, the Polar E600 and E200 enable teachers to objectively assess student and class performance while safely motivating students with instant feedback.

E Series heart rate monitors (HRMs) give physical educators a reliable way to record time spent in the target heart rate zone, ensuring that all students are exercising at their individual paces. Providing instant feedback during exercise, E Series HRMs engage all students regardless of athletic ability or skill, and help teach safe and effective exercise. Coded transmission ensures that students receive a clear heart rate signal with minimal interference from nearby students, treadmills and other motorized equipment.

E600

With E Series Software and the PC Interface accessory, the E600 can record and quickly download a day's or even a week's worth of heart rate data for both individual students and entire classes.

The E600 allows physical educators to:

- Download information directly to the Companion™ Pocket PC, office computers or TriFIT™ Systems
- Easily build individual and class reports of student progress for parents and administrators
- Objectively assess lesson effectiveness
- Fulfill grant reporting requirements

E200

Physical educators can now collect heart rate data and then manually enter it into TriFIT, PE Manager™ and E Series Softwares to create student and class reports. Program the monitors by hand, or more quickly using E Series Software on your PC.

FROM THE WRIST TO THE REPORT – MAKE DOCUMENTATION ESSENTIAL

“The E600 revolutionizes physical education. It's manageable for any teacher. There's information about student effort at your fingertips, and data can be retrieved relating to individual student achievement. With this technology, we're now able to grade on effort and we can produce printouts that show measurable improvement specific to the student.”

Rick Schupbach,
Physical Education Dept. Chair,
Grundy Center Elementary School,
Iowa

E600 AND E200 HIGHLIGHTS

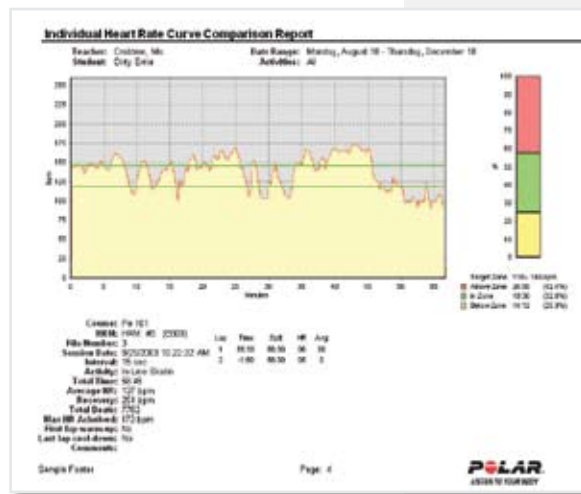

FEATURES	E600	E200
Continuous heart rate	•	•
Coded Transmission: T31c transmitter	•	•
Programmable target zone with audio/visual alarm	•	•
Cumulative time in zone	•	•
Monitor ID	•	•
Settings lock	•	•
UpLink™	•	•
Infrared downloading	•	
File storage	99 Files	1 File
Total exercise time	•	•
Time spent in target zone	•	•
Time spent above target zone	•	•
Time spent below target zone	•	•
Average heart rate of exercise	•	•
Recovery heart rate	•	•
Lap information, including average heart rate per lap	•	•
Stopwatch and two independent timers	•	•
Time of day and date	•	•
Water resistant	50m	50m
Companion™ Pocket PC compatibility	•	•
Downloading to Companion Pocket PC	•	
PE Manager™ Software Compatibility	•	•
TriFIT™ Software Compatibility	•	•
