

PE Manager™ Software

REPORTING AND GRADING SIMPLIFIED

Developed with ease-of-use in mind, Polar's PE Manager Software is a comprehensive data collection and grading tool designed specifically for PE programs. PE Manager Software can be used with the Companion™ Pocket PC or right on your office computer, and provides physical educators with a time-saving, flexible method to store, analyze and report daily class activities such as attendance, attire, performance and attitude.

PE Manager Software contains heart rate rubrics and can record and store test scores. All of which can then be exported into a Microsoft Excel™ spreadsheet — an easy, importable format for most district-level grading programs.

PE Manager Software contains several user-friendly features along with a set-up wizard that walks you through each step of its installation and allows you to import your class list from your school or TriFIT™ database.

OBJECTIVE REPORTING AND FAIR GRADING

- Provide a detailed account of attendance, various rubrics, heart rate data and test scores with the PE Report Card
- Display the exact criteria and corresponding weights used to grade students
- Develop tailored reports based on specific activity needs
- Streamline class reporting with batch printing or batch emails sent directly to students and parents
- Export information into most district level grading programs

POSITIVE RESULTS EVERYONE CAN SEE

PE Manager Software gives PE teachers the ability to customize reports, which enables them to easily illustrate their specific program's success to students, parents and administrators. This documentation of results helps teachers prepare for parent-teacher night, fulfill the reporting provisions required by many private and government grants and can even help schools prevent budget cuts.

LISTEN TO YOUR BODY

EFFICIENT DATA COLLECTION

- Use with the Companion Pocket PC for swift data collection in the field, eliminating the double recording of using both a clipboard and computer
- Input E200 heart rate data, such as time spent in target zone and average heart rate, directly into the software
- Download heart rate data from the E600 directly into PE Manager Software to completely eliminate manual recording of data
- Quickly synch the Companion with your PC or TriFIT System to retrieve and instantly download student information

SECURE DATA STORAGE

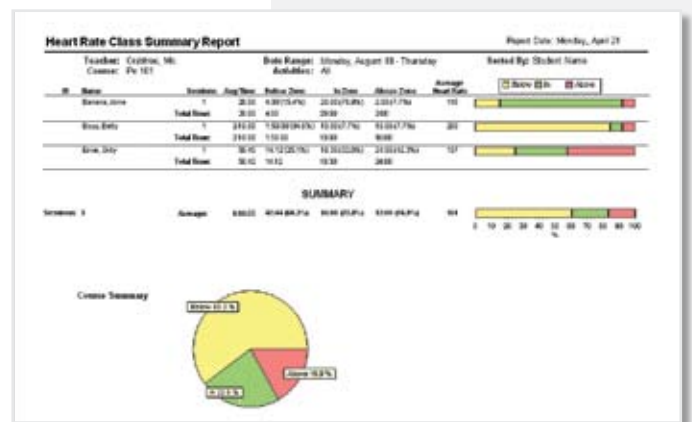

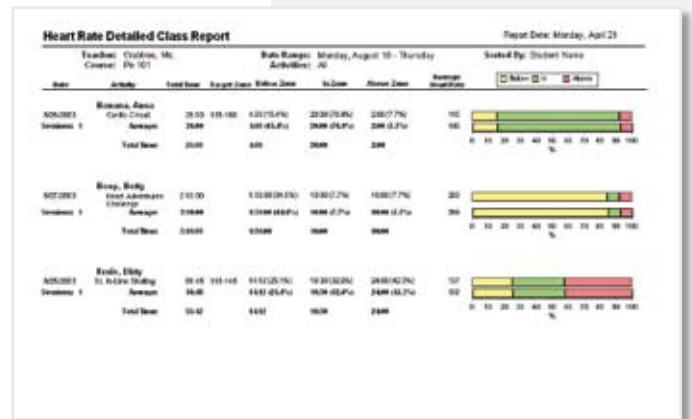

- Store all data on a teacher's desktop or a school's network
- Set data back-up utility to automatically save student information
- Login feature allows teachers to view only their students while the administrator login views all students
- Import class lists from the main school database
- Enable networking to share one database across multiple PE Manager programs

CUSTOMIZE YOUR CLASSROOM

- Easy set-up wizard
- Use the advanced Calendar option to apply your school's schedule, allowing for block scheduling and unexpected school closings
- Create custom rubrics and grading criteria
- Name up to 18 user fields to collect information
- Build custom reports with the query builder

"The teachers at Driftwood Middle have been using PE Manager Software for several years. Using the software on the handhelds to manage all aspects of our classes like attendance, grading and health notes has made our lives easier. To have all of that information at your fingertips without papers flying all over the field is truly amazing."

Casi Favre,
Health and Wellness Coordinator,
Driftwood Middle School,
Florida
