Design Loop Diagram Assignment

Create a diagram that illustrates the 8 steps in order:

1. Identifying the Problem
2. Investigation and Research
3. Brainstorming
4. Choosing a Solution
5. Developmental Work
6. Prototyping
7. Testing and Evaluation
8. Redesign

Diagram Requirements:

1. You may use Corner Cabinet and Paper Cabinet supplies to create the diagram or you may use a computer to create it (Google slides works well for this).

2. Add the title "Design Loop" somewhere on the page in big text.

3. The overall shape of the diagram must be circular to show the flow of the loop and arrows going from one step to the next.

4. Correctly label the 8 steps, in the proper order (spelling counts)

5. Use a shape to go around each step name (circles, rectangles, triangles, etc.).

6. Include an arrow to indicate the where the loop begins at the first step.

7. Add your first name and last name somewhere on the diagram.

8. Turn in the diagram by submitting it in the Finished Work Bin (if you did it on paper) or by sharing the file with Ms. Dec (if you did it digitally).

Grading:

This will be graded based on completeness and accuracy.
